

High-Performance Leadership Program

The Discovery Foundation's High-Performance Leadership Program is designed to equip senior tech executives with essential leadership skills and competencies to navigate complex challenges, and scale their organizations to drive economic growth in British Columbia's technology sector.

This leadership program is ideally suited to C-suite and senior executive teams whose tech-enabled companies (green tech, clean tech, health tech) are in a scale-up phase with leadership development needs. It is delivered monthly over 3 months (12 hours total) to a cohort of 12 participants, sourced from 3-4 different organizations based in British Columbia.

The program consists of :

- 3 training workshops (each 1pm-5pm) @ 1001 West Broadway, V6H 4B1
- optional online platform for educational support and group
- post-program review for insights and recommendations

Content will address the following :

- High-performance team practices
- Improving decision-making strategies
- Communicating leadership vision through signature stories
- Engaging with constructive conflict
- Well-being strategies for sustained high-performance
- Best practices for adaptive and distributed leadership
- The impact of AI on leadership roles and practices

Delivery dates : Mar 26, April 30, June 4 2025.

Cost : 100 % funded by Discovery Foundation.
